WRECK AT CORONA TIES UP TRAFFIC

Corona, N. M., July 20.—A freight train wreck two miles south of here, in which about six or eight cars left the track, tied up traffic for about 36 hours.

Frank and Richard Sultemier have left for points in the southwestern part of the state, by way of El Paso, to look for a business location.

A. J. Atkinson has left for Marfa, Texas, where he goes to put in a wind mill for Mr. Yates.

Miss Emma Sullivan is spending a few days visiting Miss Ada Rountree, at the W. R. Lovelace ranch.

Bob Williamson has been spending several days in the city on business.

Mr. Lamb, of Tularosa, N. M., was in town on business a few days ago.

Pablo Chavez has been spending several days in Archo, N. M., on business.

GAME ABUNDANT IN PARADISE SECTION

Paradise, Ariz., July 20.—John Hand, owner of the Hilltop mine, spent a day in town enroute to Douglas. He reported finding a dead bear in a wince on his property.

Fitch Wilson, ranch owner on Cave creek, has killed one old bear and two cubs. Several others have reported finding bear tracks, one of which is said to have measured nine inches. This looks well for some good sport this season, as the deer are also plentiful and mountain lions are by no means rare. The commercial club will do all in its power to aid hunters in securing guides and outfits, and help the good work along.

Occasionally the dweller in Paradise begins to yearn for the wilderness. The facilities for camping-out trips are many and "back to nature" enthusiasts can be supplied with scenery a few yards away from his own door.

If you want the best lumber money can buy, get yours from Lander Lumber Co.

POTTER HOTEL

SANTA BARBARA, CAL.

Located in a tropical park of 30 acres facing the Santa Barbara Channel, the most delightful combination of Beach and Mountains to be found in California. Average minimum temperature for June, July and August 4, maximum 71 with summer sunshine every day.

Col. E. Dunham, Pres. Walter E. Smith, Treas.

Subscribers failing to get The Herald promptly should call at the office or telephone No. 2030 before 6:30 p. m.

All complaints will receive prompt attention.

MINING NEWS

FIRE DOES DAMAGE TO DEADWOOD MINE

Half Ton of Bullion Shipped by the Ernestine in Ten Days.

Mogollon, N. M., July 20.—At the Deadwood mines the shaft house and galvans frame were destroyed by fire and the machinery considerably damaged.

Work on a new shaft was started at once and as soon as galloways frame is completed, which will be the present underground work will be resumed.

The mine has operated largely on custom ore since the fire. A 50 h. p. gasoline engine is being added to the mill power plant. The last cleanup in June produced 4000 Troy ounces of bullion and 1-2 tons of concentrates.

At the Ernestine Mining company, during 10 days an even half ton of gold and silver bullion was produced, which is the best record to date of any company in camp or a like period.

The cleanup for the first 10 days in July produced 9700 Troy ounces bullion and 51-2 tons of high grade concentrates. The past week's cleanup produced 700 tons.

The mine development crew has been pushing both east and west.

At the Socorro mines, special ore bins are being erected for the accommodation of custom ore that will be delivered from adjacent claims.

The mine is operating regularly on a capacity of about 175 tons daily.

The Mogollon Gold and Copper company's three shifts are sinking the mine in the Little Charlie tunnel, now down 30 feet. Proceeds of ore are taken out in development is more than ample to meet all development expenditures.

In the Iron group, a good tonnage of ore is being delivered from the Deadwood mill from the development of the group.

MINING NEWS

JUNE OUTPUT OF MAMMOTH HEAVY

Superior and Boston Begins Shipping From the Limestone Vein.

Boston, Mass., July 20.—The final figures on the production of the Miami Copper company for June are given as 2,632,310 pounds. During the month 1912 feet of development work was done. The output of the Captain ore body, which is a tongue of ore extending out from the main ore body, is about 100 tons. Equipment will be erected at the new dismantled Captain shaft, which will be connected with the main shaft by a drift from the main ore body on the 120 foot level. Waste rock from development will be hoisted through the Captain shaft and ore will be trammed on the 120 foot level to the main shaft. It is estimated that the Captain ore body contains about 7,000,000 tons of ore. Samples from the 120 foot level will soon be up to work on the north-eastern part of the property where another large body of ore is being developed. The output of the Miami district has already been proved up. Exploration of the ground below the 120 foot level is being continued by diamond drilling.

Churn drill hole No. 2 of the 8-inch Lee Ore Development company is over 400 feet deep in granite.

Shipping From Limestone. Superior and Boston has begun to ship ore from the Limestone vein and shipments from the Great Eastern vein continue. John Roach, a miner was killed on the slope on the Great Eastern vein last week by the falling of a slab of rock from the hanging wall. It is not known whether or not he had relatives in this country.

It is reported that the drift on the limestone vein at the Copper Reef mine near San Carlos has passed through the fault recently encountered and entered vein matter carrying copper, gold and silver. Samples from the vein are now being assayed.

Working time of churn drillers and the output of the mine at the Miami district has been reduced from 12 to 8 hours per day. Drillers will return to work on the 24th of July. The new scale went into effect July 15.

Well Known Miner Dies. M. E. McCarthy, superintendent of the Live Oak mine of the Inspiration Consolidated company, died very suddenly of heart disease as he was coming from the mine in his automobile. Mr. McCarthy was manager of the Hovland and Smith properties for the last six years and developed the Live Oak property from a prospect to a proved mine. He was one of the best known and best liked mine managers of the district.

WINKELMAN MEN LEASE MINE GROUP

Have Already Shipped Five Cars to the El Paso Smelter.

Hayden, Ariz., July 20.—Messrs. Hennessy, Giffin and Leonard, merchants of Winkelman, have leased a group of claims about six miles from Hayden junction, a mile west of the property of the London-Arizona Mining company. The property is called the Schneider claims, and had been worked extensively.

They have already shipped five cars to the smelter at El Paso. The last one running about \$300 net and the owners are very enthusiastic over the prospects. The ore is conveyed by burro for a mile over the mountain until the road is reached, from where it is hauled by wagon to Hayden junction for loading in cars. Four wagons are now doing the hauling. The ore runs very high in copper with very little other values.

The sixth unit of the local mill has been started and proved to the management to be in good order. The present capacity of the mill with six units running is between 800 and 700 tons of ore in the 24 hours. Work has already been started on the seventh and eighth units, which will be operated in the near future.

CHICAGO MAN MAKES VISIT TO PARADISE

Paradise, Ariz., July 20.—Father Watalewicz, president and manager Henneke, of the Savage Gold and Copper company, has returned to Chicago after having spent several days in camp looking over the Doran & Gallagher property. This is an unusually good prospect.

Goodsell, who is leasing the May property, has encountered high grade ore in the shaft. Samples sent to Douglas returned better than \$200 in silver and copper.

McDowell & Douglas, who have purchased the Hall property on Whittell, are extracting for shipment high grade lead, silver and gold ore. The ore is being encountered in shaft sinking.

A. A. Walker has taken a bond on the Duffner property, which is located on lower Whittell, near the Doran & Gallagher holdings.

Geo. Gardiner is developing a high grade lead-silver showing on his property on upper Whittell.

COL. GLENN AND HOOSIER MILITIA

Pleases Boys of Indiana National Guard as Instructor.

Col. Edwin F. Glenn, commander of the 23d Infantry, formerly stationed at Fort Bliss, but now at Fort Benjamin Harrison, Indianapolis, is acting brigadier general in command of the annual encampment of the Indiana National Guard, at Fort Harrison. The officers and non-commissioned officers of the 23d Infantry have been detailed by Col. Glenn to assist in this camp of instruction of the Hoosier militia.

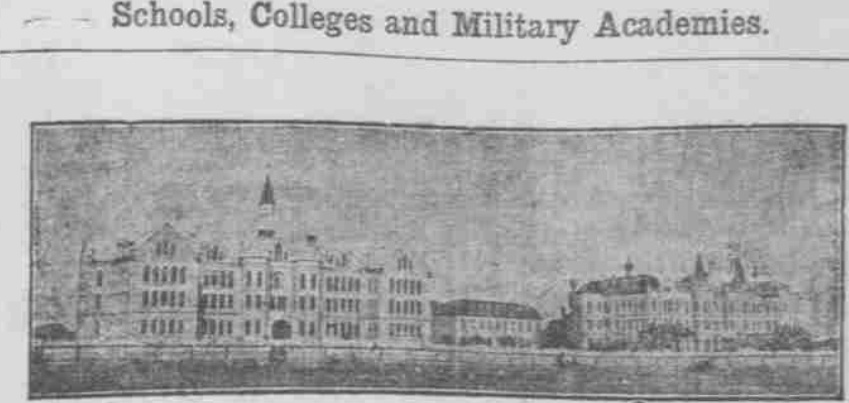

He has a number of nice things to say of Col. Glenn, who was so popular in El Paso and who was grand marshal of the military and civil parade during the statehood celebration last year.

The Indianapolis News has the following to say of the commander of the 23d:

"Col. Glenn's own personality has helped to inject spirit into the camp. He is a worker himself. He does not sit in quarters and issue orders, but goes into the field and directs the work of instruction. Col. Glenn is known among soldiers as Come-on Glenn, because he does not merely give orders or work but works himself. He is a soldier, and he is a leader. He is a man who is not 'go do.' The officers attached to his regiment are of the same type. One of them remarked to me: 'I am sure, for every order he writes says: In addition to your other duties you will, etc., etc.'"

The Indiana national guard officers are delighted over Col. Glenn's drill schedule. They say he has planned just exactly the work the men need and has determined to keep them at it.

Thirty-one pairs handsome casement sash, yours for \$1.00 a pair. Lander Lumber Co.

Our Lady of the Lake

Select Boarding School for Young Ladies and Misses. The highest standard in every department. Collegiate, Academic, Grammar, Primary, Music, Art, Expression, Domestic Science.

PARENTS, IS WORTH THE BEST YOU CAN GIVE HIM

THE SAN DIEGO ARMY AND NAVY ACADEMY gives INDIVIDUAL CARE and ATTENTION. THE THOROUGHNESS of instruction, and above all, the CHARACTER TRAINING under positive Christian influences, have made this Work distinctive. Out-of-door classes, bathing and boating during the entire year. The home training combined with military discipline—These should appeal to thoughtful parents—Write for illustrated Year Book.

CAPT. THOS. A. DAVIS, late Sixth U. S. V. Inf., PACIFIC BEACH, CAL.

"REFUGEE," A NEW GAME IN THE PLAZA

Is Played on a Cracker Box by "Refugees" to Pass the Time.

Refugee, a game, not a class of persons, is the new outdoor sport in El Paso.

Refugee is played by the Mexican "refugees," who are here awaiting the resumption of the mines and mills in Mexico. It is played daily in Cleveland square, where the refugees make their outdoor headquarters. The end of a cracker box, a pair of small sharp-pointed darts and the players are all that are necessary to start a game of refugee. The board is marked off in circles like a target. The outer rim is marked five, the next one 15, the third 25, and the small inner circle 50. The game is to throw the dart, which is modeled from a block of wood and has a sharp point, so that it will strike in the center circle. This counts 50 for the player executing the difficult feat. Should the dart strike in the next circle he scores 35, the next 15 and the next five.

To win, it is necessary to acquire 1000 points, so that it will strike in the center circle. More than two may play at the new game, which is amusing the Mexican refugees, and the daily games are watched as closely by the rooters in the downtown park as a big league ball game.

DAILY RECORD

Building Permits.

To S. C. Patton to erect one story brick dwelling, on Union avenue, between Guadalupe street and Putnam avenue; estimated value \$400.
